

ZA

MARCH 2019

INVESTMENT OBJECTIVE

The fund aims to provide investors with a net-of-fee return of 5% per annum above the annual change in the South Africa Consumer Price Index, measured over rolling three year periods. Exploiting the benefits of global diversification, the portfolio continually reflects Foord's prevailing best investment view on all available asset classes in South Africa and around the world.

INVESTOR PROFILE

Investors with a moderate risk profile who require long-term inflation beating total returns from a dynamically managed multi-asset class portfolio. It is appropriate for investors seeking a balanced exposure to domestic and foreign assets, according to Foord's best investment view. Available as a tax free investment account.

DOMICILE

South Africa

MANAGEMENT COMPANY

Foord Unit Trusts (RF) (Pty) Ltd

VAT Registration Number: 4560201594 FUND MANAGERS

Dave Foord

INCEPTION DATE

1 April 2008 / 1 March 2012

BASE CURRENCY

South African rands

Indicates the relative weight of equities in the portfolio. A higher weight could result in increased volatility of returns.

CATEGORY

Worldwide - Multi-Asset - Flexible

PORTFOLIO SIZE

R9.4 billion

UNIT PRICE (CLASS B2) 2865.52 cents

NUMBER OF UNITS (CLASS B2) 179.9 million

LAST DISTRIBUTIONS

28/02/19: 37.89 cents per unit 31/08/18 : 38.34 cents per unit

BENCHMARK

CPI + 5% per annum, which is applied daily using the most recently available inflation data and accordingly will be lagged on average by 5 to 6 weeks.

SIGNIFICANT RESTRICTIONS

None. The fund is unconstrained.

INCOME DISTRIBUTIONS

End-February and end-August each year.

INCOME CHARACTERISTICS

Low to medium income yield depending on the asset allocation strategy employed as the foreign asset component is invested in roll-up funds which do not distribute their income. Income distributions are reduced by the annual service charge, which varies with the relative performance of the fund against its benchmark.

PORTFOLIO ORIENTATION

Exploiting the benefits of global diversification, the portfolio continually reflects Foord's prevailing best investment view on all available asset classes in South Africa and around the world.

FOREIGN ASSETS

Foreign asset exposure is obtained predominantly via Foord International Fund (a conservative, multi-asset class fund) and Foord Global Equity Fund Luxembourg (a portfolio of global shares and cash). Both funds are sub-funds of Foord SICAV domiciled in Luxembourg, and are priced in US dollars.

RISK OF LOSS

Lower than that of a pure equity fund. High in periods shorter than six months, lower in periods greater than one year.

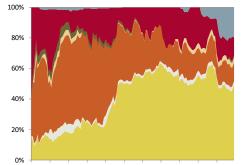

TIME HORIZON

Longer than three years.

ASSET ALLOCATION

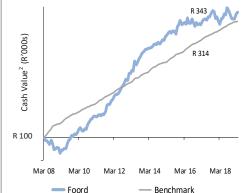

| | DOMESTIC % | FOREIGN % | TOTAL% |

INVESTMENT STRATEGY VS REG 28 PORTFOLIOS

Unconstrained investment mandates provide Foord with more investment tools to achieve long-term inflation beating returns and to better manage the risk of loss compared to prudentially compliant (Regulation 28) portfolios. Accordingly, unconstrained mandates are ideal for discretionary savings that are not required to be invested in terms of Regulation 28 limits. The Investment Strategy vs Regulation 28 Portfolios chart compares the investment returns of the unconstrained Foord Flexible Fund of Funds to Regulation 28 mandates managed by Foord (the Foord Balanced Fund returns are net of fees and therefore have been used for direct comparative purposes). The chart shows that the Foord Flexible Fund has outperformed the Foord Balanced Fund by approximately 3% per annum since its inception, illustrating the long-term opportunity cost of investing discretionary savings in a Regulation 28 portfolio

COMMENTARY

- Global developed markets (+1.3%) gained despite a deteriorating macroeconomic environment as increasingly dovish central banks provided support US equity markets (+1.8%) outperformed again in March resulting in their best quarter (+13.7%) in nearly twenty years
- Emerging markets (+0.8%) lagged on average but India (+9.2%) outperformed as Prime Minister Modi's populist Bharatiya Janata Party appeared closer to winning the upcoming
 general election China (+2.4%) also rose as recent purchasing manager index (PMI) surveys turned positive following several months of contraction
- The rand (-3.0%) weakened in line with most emerging market currencies on the back of a stronger US dollar the large allocation to foreign assets was again the largest
 contributor to portfolio returns
- The FTSE/JSE Capped All Share Index (+0.7%) was marginally higher led by resources (+4.7%) as currency weakness outweighed broadly lower commodity prices with oil (+3.6%) bucking the trend industrials (+2.9%) were lifted by a small set of large overseas companies whilst financials (-4.0%) were weighed down by banks (-6.0%)
- The portfolio's core resources and rand hedge industrial holdings contributed meaningfully BHP Group (+8.6%), Sasol (+6.1%) and Anheuser-Busch InBev (+10.6%) were sharply higher, partially offset by a market de-rating of Aspen (-33.3%)
- The All Bond Index (+1.3%) was higher as the market started to price in potential interest rate cuts later this year high real yields are an attractive investment opportunity but too restrictive given current levels of inflation and the weak economy
- The property sector (-1.9%) moved lower on broad based weakness distribution growth rates are increasingly at risk given negative rent reversions in certain sectors and nodes, high vacancy rates in office and over-leveraged balance sheets

FEE RATES (CLASS B2)

Initial, exit and switching 0.0% fees Standard annual fee for 0.6% plus VAT equalling benchmark Performance fee 10% (over- and under-performance) sharing rate Minimum annual fee 0.1% plus VAT Maximum annual fee Uncapped The fee accrued in the Foreign assets Foord global funds is rebated in full

| —Performance | -0.39% | -0.33% | |
| Transaction costs | 0.01% | 0.01% | |
| Total cost ratio | 0.39% | 0.45% | |
| | | | |

FEE STRUCTURE

The annual fee is based on portfolio performance fee with the daily fee rates being adjusted up or down based on the portfolio's one-year rolling return relative to that of its benchmark and is subject to a minimum fee rate.

PERFORMANCE FEES

Performance fees align investor and manager return objectives by rewarding the manager for outperformance while penalising the manager for underperformance. Foord's performance fee structure increases or decreases the daily fee levied based on the over- or underperformance of the Foord unit trust portfolios relative to their benchmarks. When the portfolio return exceeds the benchmark return, the daily performance fee rate is increased proportionately. Similarly, underperformance causes the daily performance fee rate to decrease proportionately. Performance fee rates are not capped for the reason that outperformance is generally not earned smoothly.

The annual fee is adjusted up or down daily by the performance fee calculated as the difference between the rolling one-year net-of-fee return and the benchmark return for the same period, multiplied by the performance fee sharing rate.

PERFORMANCE FEE EXAMPLES FOR FOORD FLEXIBLE FUND OF FUNDS (CLASS B2)

IMPORTANT INFORMATION FOR INVESTORS

Foord Unit Trusts (RF) (Pty) Ltd (Foord Unit Trusts) is an approved CISCA Management Company (#10), regulated by the Financial Services Board. Portfolios are managed by Foord Asset Management (Pty) Ltd (Foord), an authorised Financial Services Provider (FSP: 578). The custodian/trustee of Foord Unit Trusts is RMB Custody and Trustee Services (a division of FirstRand Bank Limited), contactable on T: 087 736 1732, F: 0860 557 774, www.rmb.co.za.

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Performance is calculated for the portfolio. Individual investor performance may differ as a result of the actual investment date, the date of reinvestment and withholding taxes. Performance may be affected by changes in the market or economic conditions and legal, regulatory and tax requirements. Foord Unit Trusts does not provide any guarantee either with respect to the capital or the performance return of the investment. Unit trusts are traded at ruling prices and can engage in borrowing. Foord Unit Trusts does not engage in scrip lending. Commission and incentives may be paid of so, this cost is not borne by the investment. A schedule of fees and charges and maximum commissions is available on request. Distributions may be subject to mandatory withholding taxes. A fund of funds invests only in other Collective Investment Scheme portfolios, which may levy their own charges, which could result in a higher fee structure. A feeder fund is a portfolio that, apart from assets in liquid form, consists solely of units in a single portfolio of a Collective Investment Scheme which could result in a higher fee structure. Ford Unit Trusts is authorised to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate.

This document is not an advertisement, but is provided exclusively for information purposes and should not be regarded as an offer or solicitation to purchase, sell or otherwise deal with any particular investment. Economic forecasts and predictions are based on Foord's interpretation of current factual information and exploration of economic activity based on expectation for future growth under normal economic conditions, not dissimilar to previous cycles. Forecasts and commentaries are provided for information purposes only and are not guaranteed to occur. While we have taken and will continue to take care that the information contained herein is true and correct, we request that you report any errors to Foord at unittrusts@foord.co.za. The document is protected by copyright and may not be altered without prior written consent. UNIT PRICE

Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio. Forward pricing is used. Prices are determined at 15h00 each business day and are published daily on www.foord.co.za and in national newspapers. The cut-off time for instruction is 14h00 each business day. TER

A Total Expense Ratio (TER) is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average daily value of the portfolio. These expenses include the annual fee, VAT, audit fees, bank charges and costs, including trading costs, incurred in any underlying funds. Included in the TER, but separately disclosed, is a performance fee (or credit) resulting from overperformance (or underperformance) against the benchmark. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Performance return information and prices are always stated net of the expenses, fees and charges included in the TER. The TER for the fund's financial year ended 28 February 2019 was 0.40%.

FOREIGN INVESTMENT RISK

The portfolio may include underlying foreign investments. Fluctuations or movements in exchange rates may cause the value of underlying foreign investments to go up or down. The underlying foreign investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities in the relevant countries.

Foord is a member of the Association for Savings and Investment SA.
