

PPS WORLDWIDE FLEXIBLE FUND OF FUNDS*

INVESTMENTS

As of 30 Jun 2022

FUND DESCRIPTION

This fund of funds allows for flexible asset allocation and may invest in equity securities, interest-bearing securities, listed and unlisted financial instruments and liquid assets. No maximum asset allocation applies to South African or offshore investments. Ratios may vary. The fund solely holds units in local or foreign collective investment schemes or other similar schemes.

The PPS Worldwide Flexible Fund of Funds aims to outperform inflation by 6% per year over periods longer than 84 months. The fund will typically hold between 40% and 60% in foreign assets and may hold more than 75% in equities.

*Name change from PPS Managed Flexible FoF to PPS Worldwide Flexible FoF as at 15 August 2019.

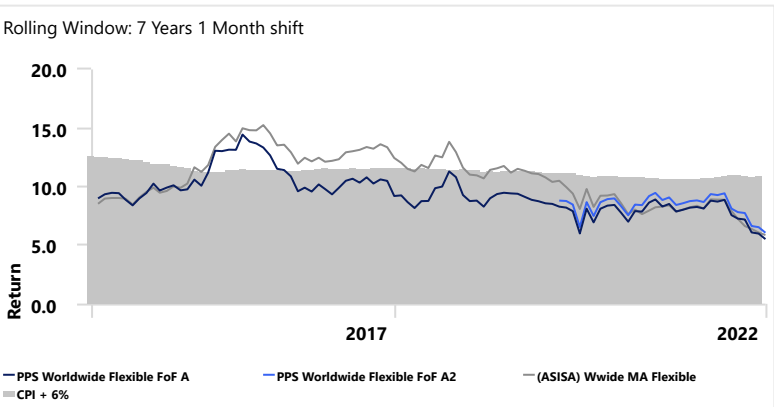

FUND OVERVIEW

List of classes**	A & A2 class
Portfolio category	(ASISA) WWide Multi Asset Flexible
Launch date	14 May 2007 (A) ; 2 January 2013 (A2)
Investment manager	PPS Multi-Managers Proprietary Limited (authorised FSP)
Benchmark	CPI for all urban areas + 6%
Income distribution	Half-yearly
Investment horizon	Long-term - seven years and longer
Portfolio size	1 131 094 971
Market value (NAV price per unit)	254.07 (A); 256.34 (A2)
Number of units held	76 137 716 (A); 57 607 564 (A2)
Manager fee (excl. VAT)	1.15% (A) ; 0.70% (A2)
Trustee	Standard Chartered Bank
Risk profile	High

**On PPS Investments platform, A2 class is available in Select range and A class is available in Original range

FUND COMMENTARY

This FoF targets CPI+6% p.a. over rolling seven years. Diversification is achieved both on an asset class and manager level, but heavily skewed in favour of SA and foreign equities. Three quarters of the FoF is invested according to our house-view allocation (that aims to achieve CPI+6% p.a. over rolling seven years at the lowest possible risk), while the remainder is invested with multi-asset class managers that follow their own strategies (and help mitigate our internal model risk). The FoF is not constrained by Regulation 28 and can express our best investment view.

The FTSE/JSE Capped SWIX fell sharply this quarter (-10.6%), tracking global stocks lower, after further upside inflation surprises in the US caused the Fed to ramp up its hawkishness, causing markets to take fright. Resources stocks were the hardest hit (-21.9%) as commodity prices corrected, but Financials also came under pressure (-15.6%), while Industrials (-2.6%) proved relatively more resilient after the jump in Naspers/Prosus. Among interest-sensitive asset classes, SA listed property fell in line with the equity market (-12.1%), and nominal bonds also declined (-3.7%), while inflation-linked bonds were a safe-haven in the broad-based market sell-off (+2.9%).

Foreign asset classes benefitted from dollar strength in the flight to safety, enhancing their performance when measured in rands. Foreign equities were down (-5.4%) in rands, with developed markets (-6.0%) underperforming emerging markets (-0.7%) significantly as Chinese equities bounced. Global listed real estate (-8.6%) also sold off sharply, while global bonds (+2.1%) rallied in response to declining US Treasury yields over the quarter. Against this backdrop, PPS Worldwide Flexible lagged its benchmark and the ASISA category average for the quarter, with its underlying foreign equity managers being the main detractors. Capital Group, Baillie Gifford and Egerton all underperformed the MSCI ACWI, as growth stocks derated sharply in response to continued concerns around inflation and the pace of interest rate hikes.

Over the seven-year investment horizon of the FoF, SA equities (up 4.6% p.a.) have materially underperformed foreign equities (up 11.7% p.a.) and our expectation for this asset class, while SA nominal bonds (up 7.4% p.a.) have outperformed SA cash (up 6.3% p.a.), SA inflation (averaging 4.9% p.a.) and SA inflation-linked bonds (up 5.1% p.a.). The FoF has lagged its benchmark over the most recent seven-year period despite being slightly ahead of peer group average. Much of the underperformance is due to the disappointing absolute returns delivered by SA equities over the period, while more recently, the foreign equity managers have not benefitted from the rotation toward cheaper, but poorer quality companies.

The house-view allocation of the FoF is made up of specialist managers and typically holds between 40% and 60% in foreign assets, and 70% to 90% in equities. The multi-asset (MA) component of the FoF consists of a combination of MA managers from various ASISA sectors that targets an overall foreign allocation of approximately 50%. In terms of portfolio changes, this quarter we downgraded foreign equity in our tactical asset allocation house view framework to "Underweight", given the significant deterioration in the global macroeconomic backdrop. We also introduced Dodge and Cox, a highly regarded value manager, which stands to benefit from the ongoing cyclical rotation. Lastly, we also introduced Blackrock, to enhance returns on the increased dollar cash holding in the portfolio.

DISCLOSURES

Collective Investment Schemes in Securities (CIS) are generally medium-to long-term investments. The value of participatory interests (units) may go down as well as up, and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager does not provide any guarantee either in respect of the capital or the return of a portfolio. A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds.

Total Expense Ratio (TER) is a measure that can be used by investors and advisers to determine how much of a CIS's underlying assets are relinquished as payment for services rendered in the administration of the CIS. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Costs (TC) is a measure that can be used by investors and advisers to determine the costs incurred in buying and selling assets underlying the CIS. TC's are a necessary cost in administering the CIS and impact CIS's returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of CIS, the investment decisions of the investment manager and the TER.

Total Investment Charges (TIC) is a measure of total cost relating to the investment. TIC is the sum of the total expense ratio (TER) and the transaction cost (TC).

TER's and TC's are expressed as a percentage of the daily net asset value of the CIS calculated over the past one year and three-year period on an annualised basis. The TER and TC disclosed are estimates based on our best estimate of the underlying costs.

These performance figures are for lump sum investments with income distributions reinvested on the ex-dividend date. All PPS Multi-Managers performance figures and values are quoted after the deduction of costs and applicable taxes incurred within the Fund. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of the reinvestment of income and dividend withholding tax. The reinvestment of income is calculated based on actual distributed amount and factors such as payment date and reinvestment date will be considered. Please note that performance over periods greater than one year is annualised. Annualised performance is the average return earned on an investment each year over a given time period. Performance is based on NAV to NAV calculations and calculated on a rolling monthly basis. The past performance is relevant to the investment or the service offered by the manager.

This fund is exposed to foreign securities and as such, it may be subject to the macroeconomic, settlement risks and political risks brought about by this exposure. It may also be subject to currency risk, which means the underlying investments of the fund could depreciate or appreciate against the reporting currency of the investor. Because these securities are listed on other exchanges, it may be subject to the relevant regulatory authority, and thus the tax implications and legislative changes of that particular entity. There may also be delays in realizing investments, due to system or liquidity issues experienced by the respective exchange. In addition, market and investment value fluctuations may occur. Overall, please be advised that, as indicated by the risk profile and potentially influenced by asset allocation, risks may be associated with this fund such as general market risk, company risk, credit risk, counterparty risk and third party operational risk.

Unit Trust prices are calculated on a Net Asset Value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses from the Fund divided by the number of units in issue. Transactions must be received by the Management Company (MANCO) by 2pm to receive the net asset value price for that day. Transaction requests received after this cut off time will only be processed on the next business day, and will receive the price of that day. Linked Investment Service Providers (LISP), specify their own transaction timelines and may take up to five business days to process. Portfolio valuations occur at 3 p.m. on business days, except the last business day of the month, when it will be 5pm. Prices are published daily and are available in the daily newspapers.

A schedule of fees, charges and maximum commissions are available on request. This fund does not charge performance fees.

The manager may close the portfolio to new investors to ensure the portfolio is managed according to its mandate.

Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge.

PPS Investments (39270), PPS Multi-Managers (28733), PPS Investment Administrators (45924) and PPS Insurance (1044) are licensed Financial Services Providers. PPS Management Company is a licensed collective investment scheme manager. PPS Nominees is an independent nominee company approved by the Financial Sector Conduct Authority (FSCA).
