

PPS EQUITY FUND

FUND DATA AS AT 30 SEPTEMBER 2018

OUR APPROACH

The portfolio invests primarily in shares of listed companies. It may, however, also invest in listed and unlisted financial instruments, and it may also hold units in collective investment schemes. Ratios may vary.

RISK PROFILE

QUARTERLY COMMENTARY

This is a multi-managed fund of funds with active manager selection. The managers in the portfolio are skilled stock pickers, each with a distinct approach to alpha generation, offering style diversification. This was a difficult quarter for the domestic equity market, with the JSE Capped SWIX declining overall. Though resources and financial stocks managed to gain ground during the quarter, industrial stocks fell sharply, offsetting gains in other areas of the market. The fund is ahead of its Capped SWIX benchmark year-to-date, but is lagging the peer group. Over the longer term, the PPS Equity Fund underperformed its benchmark during the most recent seven-year investment horizon but performed in line with its peer group average. The top 10 stocks in the portfolio currently make up 49% of the fund. Amongst the top ten stocks, Anglo American, Investec and British American Tobacco have the largest portfolio overweight positions, while FirstRand and Sasol both represent underweight positions relative to the Capped SWIX.

The PPS Equity Fund aims to provide investors with investment returns in excess of its benchmark while seeking to provide capital growth over the long-term.

Range	Select (A2 class)
Portfolio category	South African - Equity - General
Launch date	14 May 2007
Fee class launch date	02 January 2013
Investment manager	PPS Multi-Managers Proprietary Limited (authorised FSP)

DISCLOSURES

Collective Investment Schemes in Securities (CIS) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up, and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager does not provide any guarantee either in respect of the capital or the return of a portfolio. A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds.

TER & TC

Transaction Cost (TC) is a measure of the total costs incurred in buying and selling assets underlying the CIS. The TER is a measure that can be used by investors and advisers to determine how much of a Financial Product's underlying assets are relinquished as payment for services rendered in the administration of the Financial Product. TER's and TC's are expressed as a percentage of the daily net asset value of the CIS calculated over a period of three years on an annualised basis. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. TC's are a necessary cost in administering the CIS and impact CIS's returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of CIS, the investment decisions of the investment manager and the TER. Total Investment Charges (TIC) is a measure of total cost relating to the investment.

Performance figures are from PPS Multi-Managers and Morningstar. They are for lump sum investments with income distributions reinvested on the ex-dividend date. All PPS Multi-Managers performance figures and values are quoted after the deduction of costs and applicable taxes incurred within the Fund. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of the reinvestment of income and dividend withholding tax. Past performance is not indicative of future performance.

This fund is exposed to foreign securities and as such, it may be subject to the additional macroeconomic and political risks brought about by this exposure. It may also be subject to currency risk, which means the underlying investments of the fund could depreciate or appreciate against the reporting currency of the investor. Because these securities are listed on other exchanges, it may be subject to the relevant regulatory authority, and thus the tax implications and legislative changes of that particular entity. There may also be delays in realising investments, due to system or liquidity issues experienced by the respective exchange. The portfolio may also be subject to settlement risk; regional market failures will impact the portfolio heavily invested therein. In addition, normal market and investment value fluctuations will occur.

Unit Trust prices are calculated on a NAV to NAV basis and do not take any initial fees into account, it is the total market value of all assets in the Fund including any income accruals and less any permissible deductions from the Fund divided by the number of units in issue. Portfolio valuations occur at 3pm on business days, except the last business day of the month, when it will be 5pm. The closing price on the day of the transaction is processed. In the case of management companies, requests must be received by the manager by 2pm to receive the same day's price. Linked Investment Service Providers specify their own timelines and may take up to five days to process. Prices are published daily and are available in the daily newspapers.

Managers may close the portfolio to new investors to ensure the portfolio is managed according to its mandate.

Professional Provident Society Insurance Company Limited, the ultimate holding company of PPS Management Company, is a member of the Association for Savings & Investment SA (ASISA).

PPS Investments (39270), PPS Multi-Managers (28733) and PPS Investment Administrators (45924) are licensed Financial Services Providers. PPS Management Company is a licensed collective investment scheme manager.
