

PPS MODERATE FUND OF FUNDS

Fund data as at 31 March 2019

INVESTMENTS

FUND DESCRIPTION

This fund of funds allows for flexible asset allocation with equity exposure which will not exceed 60%. It may also invest in interest-bearing securities, listed and unlisted financial instruments and liquid assets. It solely holds units in local or foreign collective investment schemes or other similar schemes.

The PPS Moderate Fund of Funds aims to outperform inflation by 4% per year over periods longer than 60 months. This fund is managed according to Regulation 28 of the Pension Funds Act and therefore is a suitable standalone vehicle for retirement savings.

Quarterly Commentary

This is a multi-managed fund of funds with active asset allocation and manager selection. After a difficult 2018 the first quarter of 2019 saw both domestic and global equities delivering strong returns. The FTSE/JSE Capped SWIX Index increased by 3.9% over the three months, while the MSCI All Countries World Index increased by 12.5% in rand terms. This helped the PPS Moderate FoF to deliver a return of 6.1% over the quarter, which outperformed the peer group average of 5.3%. Over the five-year investment horizon, the fund has underperformed the inflation +4% benchmark (6.8% vs 9.1%), but delivered first quartile peer relative performance (6.8% vs 5.7%). In terms of the underlying holdings, only the domestic property allocation detracted from performance in quarter one, while all other underlying managers provided a positive contribution. There were no changes to the asset allocation, but the Abax multi-asset low allocation was increased to match the Investec multi-asset low allocation. The neutral domestic equity and domestic bond allocation is maintained as well as the overweight global equity allocation, relative to the long term strategic allocation, in the asset class building block portion of the fund. With the relatively low yields on offer, there remains no appetite for global bonds yet.

DISCLOSURES

Collective Investment Schemes in Securities (CIS) are generally medium-to long-term investments. The value of participatory interests (units) may go down as well as up, and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager does not provide any guarantee either in respect of the capital or the return of a portfolio. A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds.

Total Expense Ratio (TER) is a measure that can be used by investors and advisers to determine how much of a Financial Product's underlying assets are relinquished as payment for services rendered in the administration of the Financial Product. **Transaction Costs (TC)** is a measure of the total costs incurred in buying and selling assets underlying the CIS are a necessary cost in administering the CIS and impact CIS's returns.

It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of CIS, the investment decisions of the investment manager and the TER. TER's and TC's are expressed as a percentage of the daily net asset value of the CIS calculated over a period of three years on an annualised basis. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. **Total Investment Charges (TIC)** is a measure of total cost relating to the investment. The TER and TC disclosed are estimates based on our best estimate of the underlying costs. A schedule of fees, charges and maximum commissions are available on request.

Performance figures are from PPS Multi-Managers and Morningstar. These performance figures are for lump sum investments with income distributions reinvested on the ex-dividend date. All PPS Multi-Managers performance figures and values are quoted after the deduction of costs and applicable taxes incurred within the Fund. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of the reinvestment of income and dividend withholding tax. The reinvestment of income is calculated based on actual distributed amount and factors such as payment date and reinvestment date will be considered. Please note that performance over periods greater than one year is annualised. Annualised performance is the average return earned on an investment each year over a given time period.

This fund is exposed to foreign securities and as such, it may be subject to the macroeconomic, settlement risks and political risks brought about by this exposure. It may also be subject to currency risk, which means the underlying investments of the fund could depreciate or appreciate against the reporting currency of the investor. Because these securities are listed on other exchanges, it may be subject to the relevant regulatory authority, and thus the tax implications and legislative changes of that particular entity. There may also be delays in realizing investments, due to system or liquidity issues experienced by the respective exchange. In addition, market and investment value fluctuations may occur. Overall, please be advised that, as indicated by the risk profile and potentially influenced by asset allocation, risks may be associated with this fund such as general market risk, company risk, credit risk, counterparty risk and third party operational risk.

Unit Trust prices are calculated on a Net Asset Value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses from the Fund divided by the number of units in issue. Transactions must be received by the Management Company (MANCO) by 2pm to receive the net asset value price for that day. Transaction requests received after this cut off time will only be processed on the next business day, and will receive the price of that day. Linked Investment Service Providers (LISP), specify their own transaction timelines and may take up to five business days to process. Portfolio valuations occur at 3 p.m. on business days, except the last business day of the month, when it will be 5pm. Prices are published daily and are available in the daily newspapers.

The manager may close the portfolio to new investors to ensure the portfolio is managed according to its mandate.

PPS Investments (39270), PPS Multi-Managers (28733), PPS Investment, Administrators (45924) and PPS Insurance (1044) are licensed Financial Services Providers. PPS Management Company is a licensed collective investment scheme manager. PPS Nominees is an independent nominee company approved by the Financial Sector Conduct Authority (FSCA).
