

PPS BALANCED INDEX TRACKER FUND

Fund data as at 30 June 2019

INVESTMENTS

FUND DESCRIPTION

The fund is a South African Multi Asset High Equity fund that may invest in a combination of listed and unlisted financial instruments in the local and global equity, bond, money, and property markets with the explicit purpose of tracking the PPS Balanced Index. The manager may make use of optimisation or other techniques to track the index efficiently. This fund is managed according to Regulation 28 of the Pension Funds Act and therefore is a suitable standalone vehicle for retirement savings.

The primary investment objective of the PPS Balanced Index Tracker Fund is to track the customised PPS Balanced Index, a multi asset high equity composite index that is diversified across a number of constituent indices, as calculated and published daily by a recognised index compiler.

FUND OVERVIEW

Range	Select (A2 class)
Portfolio category	South African - Multi Asset (MA) - High Equity
Launch date	1 November 2015
Investment manager	PPS Multi-Managers Proprietary Limited (authorised FSP)

*There was a reduction in asset management fees on 2 January 2019 and estimated fees have been provided to illustrate this decrease. Calculations are based on actual data where possible and best estimates where actual data is not available.

FUND Commentary

This passive fund tracks the PPS Balanced Index which itself is a composite benchmark made up of South African (SA) and foreign equities (both developed and emerging), SA property, SA bonds (both nominal and inflation-linked) and SA cash. The benchmark is constructed to be Regulation 28 compliant, and weighted towards growth assets.

Over the investment horizon of the Fund (the fund does not yet have a five-year track record) the PPS Balanced Index returned 7.01% p.a., and 5.13% p.a. over three years. The fund is expected to track the index before fees, and holds the underlying indices of the PPS Balanced Index in the appropriate proportions. SA equities make up a significant proportion of the Fund (the strategic weight to SA equities is 45%) and subdued returns from this asset class (up just 4.3% p.a. over five years, and 2.18% p.a. over three years) has weighed down on returns. Over this period, the Fund has benefited from its exposure to both developed and emerging market equities, while nominal bonds have also contributed to returns.

Year-to-date, foreign equities (up 13.9%) have continued to outperform SA equities (up 6.9%), while SA nominal bonds (up 7.7%) have outperformed both SA cash (up 3.4%) and SA inflation-linked bonds (up 3.3%). Through the cycle our expectation is that SA equities should deliver double-digit returns and contribute more meaningfully to performance.

The benchmark weight of the PPS Balanced Index is rebalanced annually to its strategic weight, and the next rebalance will take place on the 17th of July. Given the recent outperformance of SA nominal bonds, this will result in a small reallocation from SA nominal bonds to both SA and developed market equities.

INVESTMENTS

DISCLOSURES

Collective Investment Schemes in Securities (CIS) are generally medium-to long-term investments. The value of participatory interests (units) may go down as well as up, and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager does not provide any guarantee either in respect of the capital or the return of a portfolio. A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds.

Total Expense Ratio (TER) is a measure that can be used by investors and advisers to determine how much of a Financial Product's underlying assets are relinquished as payment for services rendered in the administration of the Financial Product. **Transaction Costs (TC)** is a measure of the total costs incurred in buying and selling assets underlying the CIS are a necessary cost in administering the CIS and impact CIS's returns.

It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of CIS, the investment decisions of the investment manager and the TER. TER's and TC's are expressed as a percentage of the daily net asset value of the CIS calculated over the past one year and three year period on an annualised basis. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Total Investment Charges (TIC) is a measure of total cost relating to the investment. The TER and TC disclosed are estimates based on our best estimate of the underlying costs. A schedule of fees, charges and maximum commissions are available on request.

Performance figures are from PPS Multi-Managers and Morningstar. These performance figures are for lump sum investments with income distributions reinvested on the ex-dividend date. All PPS Multi-Managers performance figures and values are quoted after the deduction of costs and applicable taxes incurred within the Fund. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of the reinvestment of income and dividend withholding tax. The reinvestment of income is calculated based on actual distributed amount and factors such as payment date and reinvestment date will be considered. Please note that performance over periods greater than one year is annualised. Annualised performance is the average return earned on an investment each year over a given time period.

This fund is exposed to foreign securities and as such, it may be subject to the macroeconomic, settlement risks and political risks brought about by this exposure. It may also be subject to currency risk, which means the underlying investments of the fund could depreciate or appreciate against the reporting currency of the investor. Because these securities are listed on other exchanges, it may be subject to the relevant regulatory authority, and thus the tax implications and legislative changes of that particular entity. There may also be delays in realizing investments, due to system or liquidity issues experienced by the respective exchange. In addition, market and investment value fluctuations may occur. Overall, please be advised that, as indicated by the risk profile and potentially influenced by asset allocation, risks may be associated with this fund such as general market risk, company risk, credit risk, counterparty risk and third party operational risk.

Unit Trust prices are calculated on a Net Asset Value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses from the Fund divided by the number of units in issue. Transactions must be received by the Management Company (MANCO) by 2pm to receive the net asset value price for that day. Transaction requests received after this cut off time will only be processed on the next business day, and will receive the price of that day. Linked Investment Service Providers (LISP), specify their own transaction timelines and may take up to five business days to process. Portfolio valuations occur at 3 p.m. on business days, except the last business day of the month, when it will be 5pm. Prices are published daily and are available in the daily newspapers.

The manager may close the portfolio to new investors to ensure the portfolio is managed according to its mandate.

PPS Investments (39270), PPS Multi-Managers (28733), PPS Investment, Administrators (45924) and PPS Insurance (1044) are licensed Financial Services Providers. PPS Management Company is a licensed collective investment scheme manager. PPS Nominees is an independent nominee company approved by the Financial Sector Conduct Authority (FSCA).
