

PPS WORLDWIDE FLEXIBLE FUND OF FUNDS*

Fund data as at 31 March 2020

INVESTMENTS

FUND DESCRIPTION

This fund of funds allows for flexible asset allocation and may invest in equity securities, interest-bearing securities, listed and unlisted financial instruments and liquid assets. No maximum asset allocation applies to South African or offshore investments. Ratios may vary. The fund solely holds units in local or foreign collective investment schemes or other similar schemes.

The PPS Worldwide Flexible Fund of Funds aims to outperform inflation by 6% per year over periods longer than 84 months. The fund will typically hold between 40% and 60% in foreign assets and may hold more than 75% in equities.

*Name change from PPS Managed Flexible FoF to PPS Worldwide Flexible FoF as at 15 August 2019.

Fund Commentary

This Fund of Funds targets CPI+6% p.a. over rolling seven years. Diversification is achieved both on an asset class and manager level, but heavily skewed in favour of SA and foreign equities. Approximately half of the Fund of Funds is invested according to our house-view allocation (that aims to achieve CPI+6% p.a. over rolling seven years at the lowest possible risk) while the remainder is invested with multi-asset class managers that follow their own strategies (and help mitigate our internal model risk). The Fund of Funds is not constrained by Regulation 28 and can express our best investment view.

Over the seven-year investment horizon of the Fund of Funds, SA equities (up 7.6% p.a.) have materially underperformed foreign equities (up 17.8% p.a.) and our expectation for this asset class, while SA nominal bonds (up 7.0% p.a.) have outperformed SA inflation (up 5.1% p.a.) and both SA inflation-linked bonds (up 3.8% p.a.) and SA cash (up 6.7% p.a.). The Fund of Funds over this seven-year period has benefited from our house-view being overweight foreign equities relative to SA equities, but the underperformance of SA equities has been a material detractor to performance, given the strategy's dependence on SA equities to deliver on the Fund of Funds' objectives. The house-view allocation typically holds between 40% and 60% in foreign assets, and 70% to 90% in equities.

This year, foreign equities (up 23.1%) have substantially outperformed SA equities (up 6.8%), while SA nominal bonds (up 10.3%) have outperformed both SA cash (up 7.3%) and SA inflation-linked bonds (up 2.6%). Within SA equities, industrials up (11.0%) and resources (up 25.3%) have significantly outperformed financials (up 0.9%). Large cap rand hedge counters with significant offshore earnings have driven the industrial sector, while resources have been driven by spot commodity prices remaining higher than expected (despite global economic growth having decelerated). Strong recent performance of the underlying asset classes has contributed to the Fund of Funds achieving its inflation objective year-to-date, but has not yet been sufficient to lift its longer-term returns.

No changes were made to the multi-asset (MA) component of the Fund of Funds this quarter, which consists of a combination of MA managers from various ASISA sectors that target an overall foreign allocation of 50%. A new manager, Fairtree, was introduced into the equity building block of the specialist component of the Fund of Funds this quarter, replacing Coronation and Perpetua. Fairtree is a high conviction, style agnostic manager, and its introduction enhances the equity building block, and reduces its style dependence.

DISCLOSURES

Collective Investment Schemes in Securities (CIS) are generally medium-to long-term investments. The value of participatory interests (units) may go down as well as up, and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager does not provide any guarantee either in respect of the capital or the return of a portfolio. A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges, which could result in a higher fee structure for the fund of funds.

Total Expense Ratio (TER) is a measure that can be used by investors and advisers to determine how much of a Financial Product's underlying assets are relinquished as payment for services rendered in the administration of the Financial Product. **Transaction Costs (TC)** is a measure of the total costs incurred in buying and selling assets underlying the CIS are a necessary cost in administering the CIS and impact CIS's returns.

It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of CIS, the investment decisions of the investment manager and the TER. TER's and TC's are expressed as a percentage of the daily net asset value of the CIS calculated over the past one year and three year period on an annualised basis. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. **Total Investment Charges (TIC)** is a measure of total cost relating to the investment. The TER and TC disclosed are estimates based on our best estimate of the underlying costs. A schedule of fees, charges and maximum commissions are available on request.

Performance figures are from PPS Multi-Managers and Morningstar. These performance figures are for lump sum investments with income distributions reinvested on the ex-dividend date. All PPS Multi-Managers performance figures and values are quoted after the deduction of costs and applicable taxes incurred within the Fund. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of the reinvestment of income and dividend withholding tax. The reinvestment of income is calculated based on actual distributed amount and factors such as payment date and reinvestment date will be considered. Please note that performance over periods greater than one year is annualised. Annualised performance is the average return earned on an investment each year over a given time period.

This fund is exposed to foreign securities and as such, it may be subject to the macroeconomic, settlement risks and political risks brought about by this exposure. It may also be subject to currency risk, which means the underlying investments of the fund could depreciate or appreciate against the reporting currency of the investor. Because these securities are listed on other exchanges, it may be subject to the relevant regulatory authority, and thus the tax implications and legislative changes of that particular entity. There may also be delays in realizing investments, due to system or liquidity issues experienced by the respective exchange. In addition, market and investment value fluctuations may occur. Overall, please be advised that, as indicated by the risk profile and potentially influenced by asset allocation, risks may be associated with this fund such as general market risk, company risk, credit risk, counterparty risk and third party operational risk.

Unit Trust prices are calculated on a Net Asset Value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses from the Fund divided by the number of units in issue. Transactions must be received by the Management Company (MANCO) by 2pm to receive the net asset value price for that day. Transaction requests received after this cut off time will only be processed on the next business day, and will receive the price of that day. Linked Investment Service Providers (LISP), specify their own transaction timelines and may take up to five business days to process. Portfolio valuations occur at 3 p.m. on business days, except the last business day of the month, when it will be 5pm. Prices are published daily and are available in the daily newspapers.

The manager may close the portfolio to new investors to ensure the portfolio is managed according to its mandate.

PPS Investments (39270), PPS Multi-Managers (28733), PPS Investment, Administrators (45924) and PPS Insurance (1044) are licensed Financial Services Providers. PPS Management Company is a licensed collective investment scheme manager. PPS Nominees is an independent nominee company approved by the Financial Sector Conduct Authority (FSCA).
